**SPEAKER TO CONFERENCES
AND CONGRESSES**

Dates (place)	December 15, 2009 (Mediterranean University of Reggio Calabria)
Conference Title	"Promotion and diffusion of non-GMO legume forage crops in the Calabrian livestock system".
Contribution submitted	Use of alternative protein sources to soy-based feed in lamb feeding.
Dates (place)	From 9th to 12th July 2009 (Matera)
Conference Title	"On the trail of the Podolian cattle"
Contribution submitted	Foti F., Bumbaca L., Caparra P., Cilione C., Chies L., Scerra M., Giorgi A., Scerra V.. Effect of feeding system on the meat quality of young Podolian bulls (published in "Taurus", n. 3, year XX, 2009, pp. 318-319).
Dates (place)	From 25th to 28th October 2006 (Lamezia Terme - Catanzaro)
Congress Title	XVII National Congress of the Italian Society of Sheep and Goat Pathology and Breeding (SIPAOC).
Contribution submitted	Foti F., Caparra P., Scerra M., Cilione C., Vottari G., Scerra V., Sinatra M.C.. "Chemical and nutritional characteristics of kikuyu (<i>Pennisetum clandestinum</i> Hochst) in different seasons" (published in Proceedings of the XVII National Congress of the Italian Society of Pathology and Breeding of Sheep and Goats, 2006).
Dates (place)	From 8th to 10th September 2005 (University of Catania)
Conference Title	11th Seminar of the FAO-CIHEAM Sub-Network on Sheep and Goat Nutrition – University of Catania.
Contributions submitted	Caparra P., Foti F., Scerra M., Cilione C., Vottari G., Galofaro V., Sinatra MC, Scerra V.. "Effect of feeding system on intramuscular fatty acid composition of suckling lambs" (published in "Options méditerranéennes. série A", Journal article, n. 74, 2005, pp. 95-99, ISSN: 1016-121X). SCIENTIFIC ACTIVITY

The research activity has mainly concerned and concerns the study of the influence of factors exogenous and endogenous to the animal on the production performance and quality of animal-derived products (meat, milk) and in particular on the dietary, nutritional, and organoleptic qualities. In this context, he has been interested in issues related to the role of pastures and feeding on the nutritional and aromatic qualities of meat, milk and cheese. A significant number of researches have concerned the study of the possible use of agricultural and agro-industrial by-products in animal feed in livestock production.

Current research is aimed at studying the effects of diets based on by-products with bioactive components, evaluated in terms of technological and nutritional qualities and functional properties of meat obtained from native Calabrian breeds.

SCIENTIFIC PRODUCTION

He is co-author of 54 scientific publications of interest national and international (list available online at https://www.unirc.it/didattica/scheda_persona.php?id=700#pubblicazioni), published in conference proceedings or in national and international scientific journals of high impact.

Main bibliometric indices (source: Scopus): Total number of publications in extenso in international peer-reviewed journals = 28; Total impact factor of publications (IF) = 107.72; average Impact Factor per publication = 4.31; number of citations in 422 publications = 470; h-index = 11.
